
FRISTADS®
2023

Innovation built on experience.

For nearly a century, we have lived and breathed workwear. The styles and materials have evolved over time but our commitment to quality and performance is as strong today as it was when we started.

We are passionate about what we do. We want to help our customers succeed and prosper. And we go the extra mile to improve. Always with our users and the planet in focus.

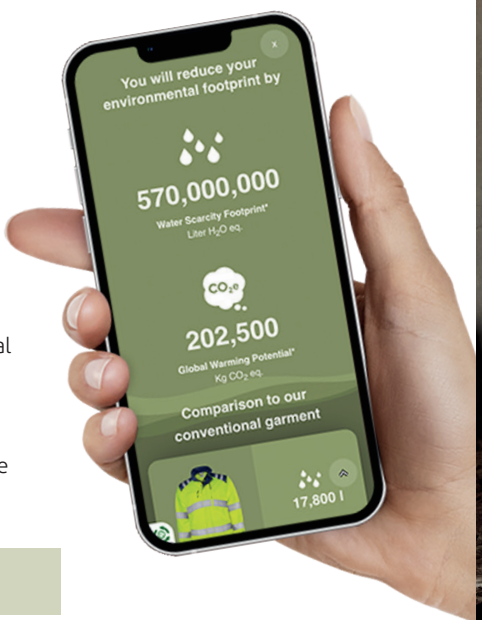

The world's first environmentally declared garment collection.

Fristads is the first clothing producer in the world to publish an environmental product declaration of a garment according to the EPD standard for measuring the total environmental impact of a garment – from choice of material to delivery of the finished garment. We introduced the EPD because we want to contribute to positive change and greater transparency when it comes to the environmental impact of our products.

Calculate your potential environmental savings with the Green Calculator!

In 2021 we developed and launched our Green Calculator, enabling anyone to calculate their potential environmental savings by choosing workwear from our Fristads Green collection. Thanks to the calculator it is now easier than ever for consumers, purchasers and those responsible for public procurement to make conscious choices about their workwear.

TRY THE GREEN CALCULATOR AT FRISTADS.COM

EPD®

Fristads Green products have a certified Environmental Product Declaration (EPD) giving information about the environmental performance, contents and recycling, which has been controlled and verified according to the requirements of the International EPD® System. More information is available at environdec.com. The EPD registration numbers are displayed in connection to the products and at fristads.com.

MARKER

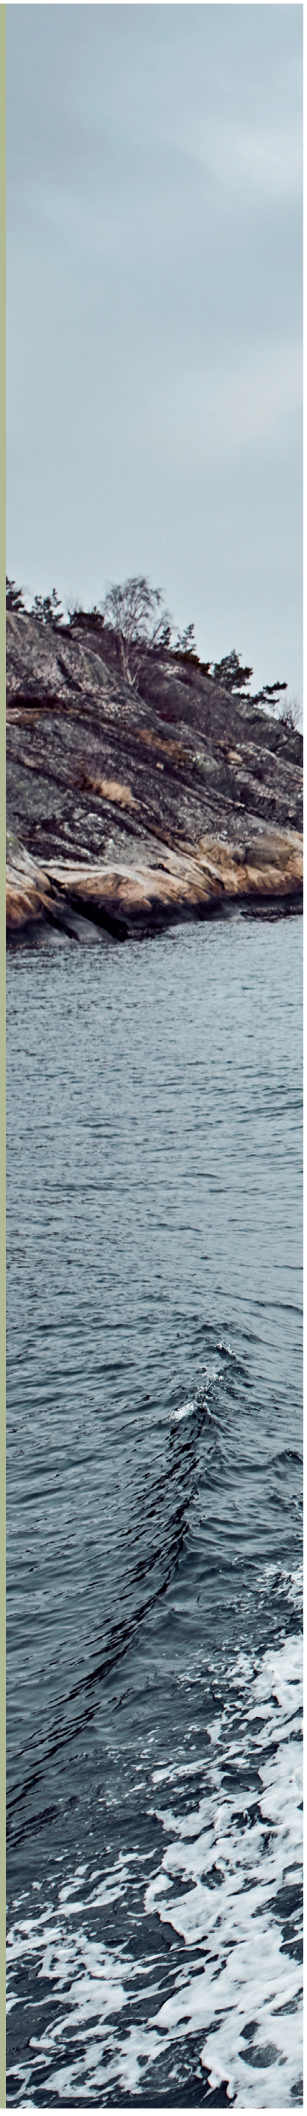

Garments that are made of more than 50 % more sustainable materials.

Fristads Green
Garments that have an EPD - Environmental Product Declaration.

Your environmental choices make a difference.

10 facts about our Green garments.

1. All garments have an EPD – Environmental Product Declaration
2. We use more sustainable materials: Recycled polyester made of recycled PET bottles, Lyocell from traceable and sustainably sourced wood, organic cotton and bio-based material.
3. Smart design solutions to save energy in production
4. More efficient use of materials to avoid unnecessary waste
5. All waste material from production is reused
6. We work on several fronts to reduce our water scarcity footprint, for example by choosing materials and dyeing methods that conserve water.
7. Whenever possible we avoid the use of plastic bags – the garments are folded using a special folding technique.
8. All transport is by sea and road, which has significantly lower environmental impact than air transport
9. All garments are OEKO-TEX® certified
10. The Fristads Green garments fulfil the same high requirements on quality, durability, comfort and functionality as our other garments.

Efficient packing and shipment.

- Whenever possible we avoid the use of plastic bags, and fold the garments with a special technique
- For our high-vis garments we use a sustainable packing solution with plastic bags made of recycled polyester from recycled PET bottles.
- We optimise the use of transport capacity
- All transport is by sea and road, which has significantly lower environmental impact than air transport.

Zero waste.

- We reuse all waste material from production
- All surplus material is utilised on site
- Surplus material from all Fristads Green products is turned into other products like mattressfilling, socks, blankets and "comfort pads"

In our lab, the best materials get the worst possible treatment.

The Fristads laboratory tests and checks the physical properties of raw materials and garments – an important part of product development. Abrasion resistance, pilling, tear strength, tensile strength, colour fastness and dimensional change are just some of the many tests that are carried out. They are all conducted in a conditioned environment in accordance with the relevant international standards as used by accredited laboratories.

A unique development process.

In every detail

When we design our garments, our most important input comes from the professionals who rely on our clothes every day. Innovative details and ergonomic design ensure your freedom of movement and efficiency at work. To ensure Fristads quality, we also perform our own tests – comprising everything from strength, tensile and abrasion, to real-life usability and user comfort. True to our Scandinavian design heritage, function and style always go hand in hand. Every little detail or seam is there for a reason – to make you do better and look good.

We collaborate with carefully selected brands.

GORE-TEX · PYRAD · CORDURA FABRIC · POLARTEC · Woolpower · COOLMAX · DEVOLD PROTECTION · 375

Fristads CORE assortment.

Based on experience and feedback from the people wearing our products, and with the aim of even further strengthening our offering, we have created the Fristads CORE assortment. A selection of the most well-used, appreciated and recommended styles throughout Europe. We keep extra-large stocks of our CORE assortment to ensure products are available at all times.

CORE

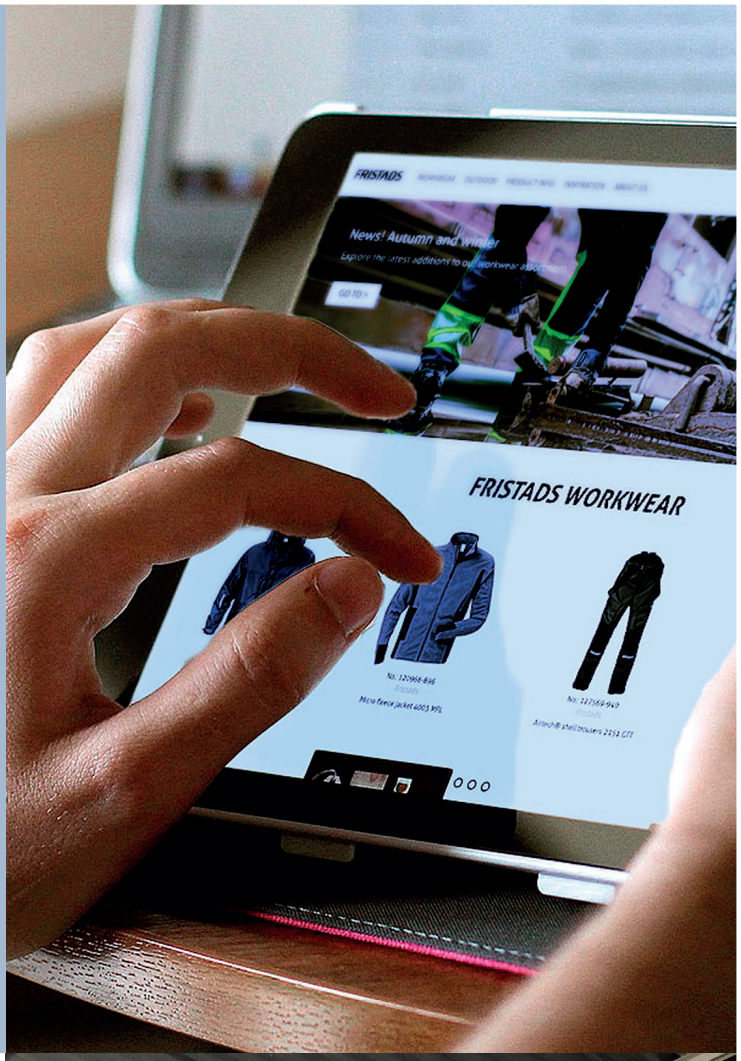

Value-added services.

We can help you with everything from logotype embroidery to complete personalised workwear solutions.

Our VAS department offer many different services to personalise and modify existing garments. Contact our customer service for further information.

Online services.

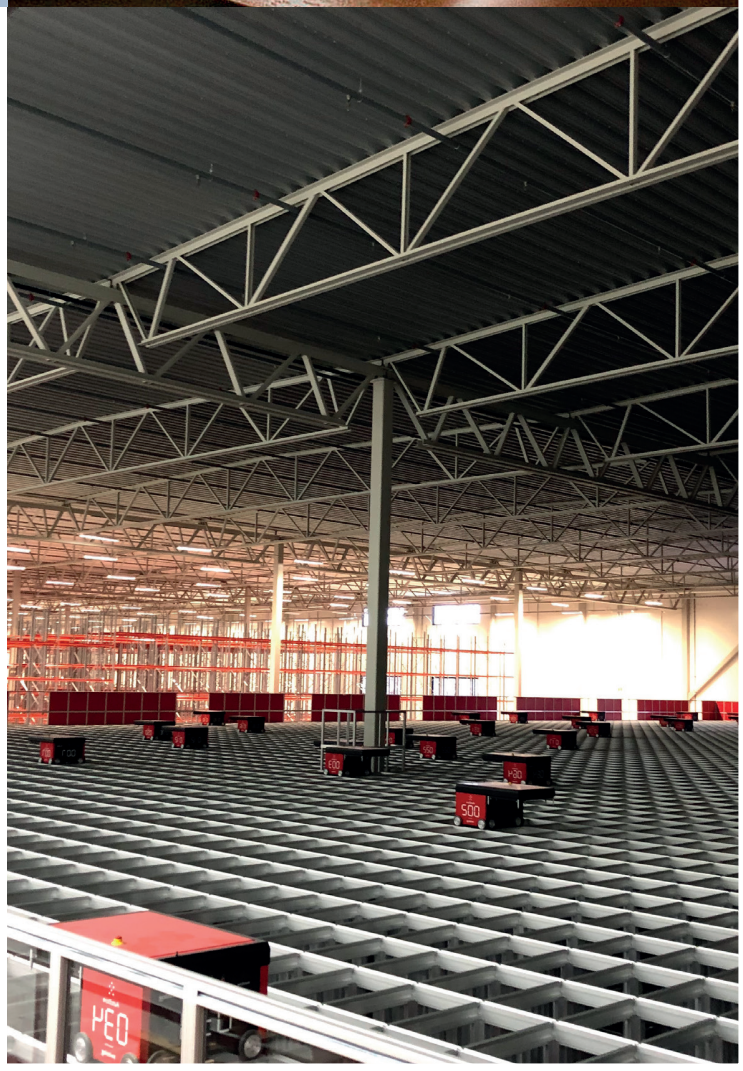

At fristads.com you find everything you need to know about us. Find the products you are looking for, delve deeply into certificates and norms, download pictures, make your own catalogue and find out where to buy our garments.

Distribution centre enables shorter lead times.

In our head office and distribution centre outside Borås in Sweden, we have gathered all our central services and functions under one roof. We have also implemented an auto store solution to meet the growing requirements for shorter lead times and efficiency in delivery.

By having a complete solution with warehouse, Value-Added Services (printing, embroidery and sewing changes) and distribution in one place, we are reducing our environmental footprint as well. Thanks to the reduction in internal transports, we are saving the CO_2 emissions from one lorry driving 8800 km every year.

We want to make a change.

We have been making quality workwear for almost 100 years. The small business that originally started in Sweden has now become a large company with a presence throughout Europe. We have continuously developed our operation and found more efficient ways to design, develop and manufacture our products.

Going forward, we want to find new ways to challenge the traditional way of producing workwear and inspiring other actors within our business to follow suit. This curiosity and drive to develop more sustainable workwear is always on our minds when we design a new garment, develop a new collection and test a new raw material or fibre. By challenging the way we work and striving to find new solutions, we are continuously evolving and doing better every day.

As we continue to grow, the way we interact with the world around us becomes increasingly important, both for us as a company and for individual employees. Everything we do follows the rules and regulations that apply to our industry and is based on a number of principles and guidelines that are unique to our business. This set of rules sets a structure for our operations and controls all our activities to ensure that we act responsibly.

We don't just follow the rules and regulations for environmental protection, we strive to go above and beyond the requirements. Thanks to the development of the Environmental Product Declaration Standard for garments we are now able to measure the environmental impact of a garment, from the time when we design it until we ship it to our customers. These insights guide us on a daily basis as we continue to make our range of clothes even more sustainable, both for the people wearing them and for the planet.

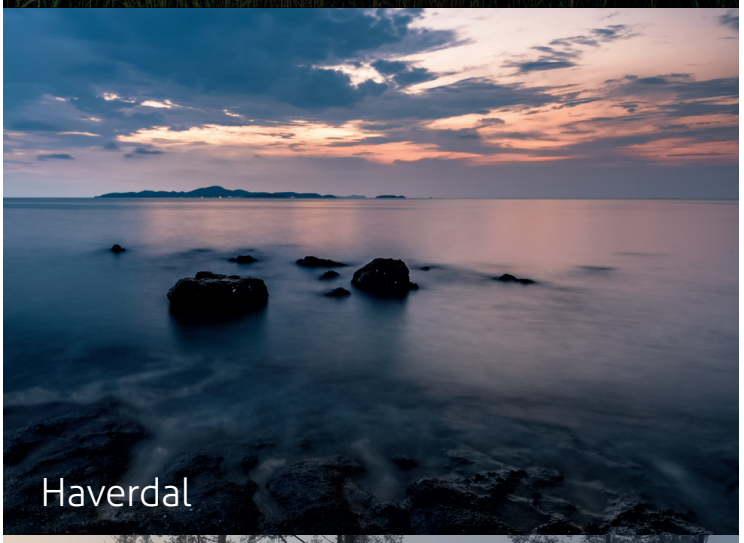

In the long-term, our goal is to close the loop on our production. Making high-quality workwear that stands the test of time is a good start. In the next phase of our sustainability work we will also aim to reduce the waste from our production and find ways to reuse and repurpose worn-out garments, making sure they have reached their full potential before being discarded. We are already using all the waste from the production of our Green garments to make new products and working with selected customers on a pilot program that will collect and recycle old garments. Expect to see more of these innovative projects, as we continue to lead on sustainability in the workwear industry. Today and in the future.

Learn more about our sustainability work at fristads.com.

Meet Fristads' new product concepts

With one of the broadest product ranges in the industry, we are always looking for ways to help our customers find the right garments. As a part of this effort, we have developed six new product concepts. These carefully curated collections make it easier for retailers to select and sell popular products, and for end customers to colour match and "shop the look."

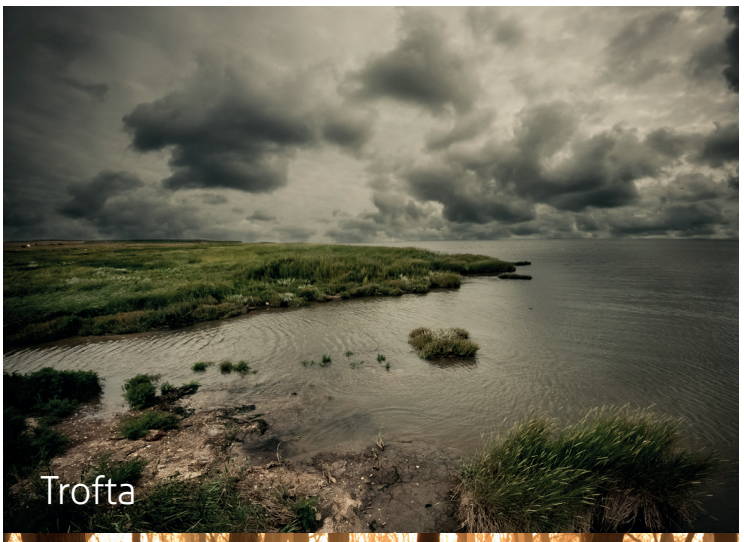

Rooted in Scandinavian nature

When we explored names for our new collections we tapped into our Scandinavian roots and the connection with nature. The result is six product concepts that bear the names of Swedish nature preserves: Alnaryd, Haverdal, Tyresta, Trofta, Stiby and Skarup.

Versatile workwear for all seasons

The Alnaryd, Haverdal and Tyresta product concepts span our workwear for building and construction, from reliable all-round garments to our most technically advanced products. Each family is based on some of our most versatile and bestselling work trousers combined with colour coordinated tops and jackets for all seasons. The Trofta and Stiby product concepts include our new certified high-visibility product ranges stretch and lightweight respectively, and Skarup is our brand-building, colour-matched cross-over collection, previously known as Fusion.

Trofta

Stiby

Skarup

New hangtags

To introduce the new product concepts, we have developed a new hang tag made of brown cardboard and FSC labeled paper. Garments with an Environmental Product Declaration will have an extra tag featuring a green leaf to set them apart from the rest of our range.

We have also created a tag for garments that contain at least 50% materials that are more sustainable, such as recycled polyester and plant-based materials, or are produced using more sustainable techniques. These tags feature a green square. Both labels will make it easier for the end user to choose products with a smaller environmental footprint, which is an important goal for our sustainability work.

Building & Construction.

Classic style meets modern fit and attitude

For you who work within building and construction we offer one of the widest assortments of workwear, from bestselling classics to garments with more modern fit. Nearly a century of developing workwear for craftsmen, in combination with a never-ending dialogue with our customers, has taught us to always focus on durability, comfort and function.

Comfort, function, durability and design.

- Thoroughly tested materials with high durability and comfort
- Function and design developed in close collaboration with users
- Carefully designed fit for great comfort
- CORDURA® reinforcements for extra durability
- Wide range of stocked sizes
- Trousers also available in women's models
- Most garments are OEKO-TEX® certified
- Kneepockets are certified according to EN 14404 type 2 level 1 together with knee protection 9200 KP

Protect your knees.

Working in kneeling positions is a great strain on the body and on your knees in particular. Therefore, it is important to use the right kind of knee protection that fits optimally on your knees.

Our flexible kneepads 9200 KP, 124292, are certified according to EN 14404 type 2, level 1.

Fristads stretch

Stretch improves comfort, that's a fact. We offer a variety of garments in different stretch materials and these symbols will make it easier to find what you prefer.

4-WAY STRETCH

The 4-way stretch is a highly elastic material which stretches in every direction, offering full flexibility.

STRETCH

The 2-way stretch stretches in one direction, offering flexibility and comfort.

MECHANICAL STRETCH

Mechanical stretch contains no stretch fibres but is weaved to offer some stretch for extra comfort.

New and improved concepts.

An important part of our work to lead on sustainability, innovation and product development is the way we present and package our products. That is why we are now introducing new and improved concepts for all professional users, easy for retailers to purchase and sell to the end customer.

SNIKKI Toolbelts.

Proofed and acknowledged by craftsmen

With the right equipment, you have your most important tools close to hand while at the same time reducing strain on your body. The original SNIKKI toolbelts, pockets and holders are well-known for their high quality, great function and outstanding performance. Tested and developed in cooperation with users.

High-quality products made with proud tradition and creative innovation.

Just by Lake Siljan in Dalecarlia in Sweden, you will find the SNIKKI production site. We have more than 50 years' experience of making and creating tool belts. All our products are developed in close collaboration with craftsmen and high quality has always been our guiding star.

Specially developed soft leather.

All our products are made of high-quality leather that stays soft even when it's cold. The inside is specially treated so it stays comfortable and does not chafe the hand. Our Ergo belt has soft Swedish vegetable-tanned leather on the inside so it's comfortable closest to the body.

Manufactured in Sweden.

Our Ergo leather belt and all our black leather toolbelts, holders and pouches are sewn and produced in Sweden. Our black leather products are manufactured of a soft special treated high-quality leather with water-repellent surface.

Our ergonomic system saves your back and provides high comfort

Wide comfortable shoulder straps that will not slip off while kneeling

Mesh panel for ventilation

Elasticated parts

Easy to adjust

Belt in ergonomic design for extra comfort

Pouches and holders are easily attached

Inside in soft vegetable-tanned Swedish leather. No hard edges that irritate or chafe the body

Two pockets for nails and screws

Rivets reinforced

Provides ideal weight distribution and mobility

Two Quick-grip pocket holders at front

Two pen pockets at front

Outside of heavy-duty leather. Durable nylon strap and metal buckle

Knife holder

Hammer loop

Holder, e.g. for screwdriver

SNIKKI Ergo system

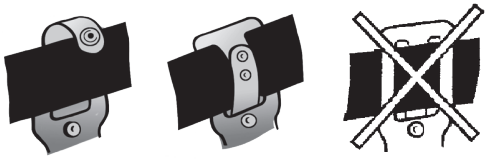

– Make your own toolbelt

1. Choose an Ergo belt, soft padded belt or a regular leather belt. For extra relief for your shoulders and greater comfort, combine with our tool braces.

2. Choose the pouches and tool holders you require. The comfort system is flexible and you can easily replace pouches and holders.

Advantages of the SNIKKI Ergo system

- Ergonomic design – saves your back, shoulders and neck
- Gives more uniform distribution of the tools' weight
- Tools and materials are easily accessible
- Provides more freedom of movement
- Easy to put on and take off. All material pockets and holders can be easily replaced when needed
- Suitable for all garments – whatever the weather and season
- Lets you carry exactly what you need

Quick-grip – this is how to fasten our pouches and holders

Place the part with snap fastenings over your belt.
Press and then fasten on the back.

Lightweight functional Ergo system.

It's never been easier to carry your tools and materials

The lightweight SNIKKI Ergo system is made of a lightweight yet very durable material which is dirt- and water-repellent. The belt and braces feature an ergonomic design to save your back, shoulders and neck.

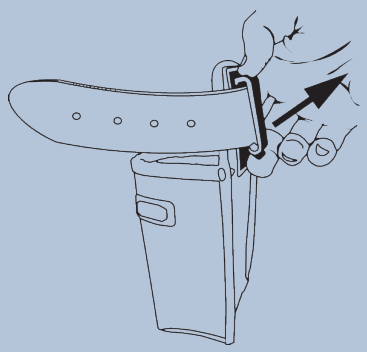

All pouches and holders can also be combined with the leather Ergo system. You can easily attach the separate holders to any ordinary belt.

SNIKKI-guide Combine as you wish

All our holders and pouches can be attached to our Ergo belts, soft padded belts or any ordinary belt. Be inspired by our SNIKKI guide at fristads.com and put together a toolbelt that fits your unique needs.

Visit fristads.com

Quick-snap – quick and easy to use

The unique clip lets you attach or remove pockets on your Ergo belt, or any other belt for that matter, quickly and easily.

Let your belt snap in place under the hook. To remove it, simply loosen the hook a bit and press upwards.

Skarup.

Dressing every professional for better performance

No matter your profession, Skarup brings people and businesses together and emphasises brand identity. The Skarup concept, previously known as Fusion, meets the needs of a variety of users within industry, service and building & construction. Garments that provide possibilities, comfort and functionality and set a new standard for cross-over workwear.

Design, function and fit that creates identity.

- Perfect for users within industry, service and building & construction
- Mechanical stretch garments give extra comfort
- 4-way stretch trousers for superior freedom of movement
- Comfortable contemporary fit tested by users
- Functional design with many pockets and features
- Durable lightweight materials
- Discreet reflective detailing for enhanced visiblity
- Many colour combinations – a colour-matched complete solution
- Designed to provide ample space for profiling with company logo
- Leasing-laundry tested according to ISO 15797 and PRO-labelled (except for softshell products)
- Most products can be equipped with RFID chip
- CORDURA® reinforcements for extra durability
- Kneepockets are certified together with knee pad 9200 KP
- Wide range of sizes
- Garments also available in women's models
- Year-round solution – matching winter jackets and fleece jacket
- All garments are OEKO-TEX® certified

Skarup – one of our new concepts.

With one of the broadest product ranges in the industry, we are always looking for ways to help our customers find the right garments. As a part of this effort, we have developed six new product concepts. The Skarup concept presented here was previously known as Fusion, and is our largest concept. It has a broad range in both products and colors that will suit many different users with different needs.

The complete cross-over collection.

GRT – GREEN SKARUP

- Recycled and sustainable material
- Lightweight and soft
- Quick-drying
- Approved for industrial laundry
- 60° and tumble dry
- 65% recycled polyester, 35% lyocell
- Weight 260 g/m²
- OEKO-TEX® certified

RFID CHIP

The RFID chip provides an identification and tracking solution which optimises workflow for industrial laundries and in warehouses. Most Skarup garments can be equipped with RFID chip as a VAS (Value Added Service) solution.

APPROVED FOR INDUSTRIAL LAUNDRY

Most of the garments in the Skarup range are approved for industrial laundry according to ISO 15797. In addition, our garments are tested in some of Europe's largest laundries in cooperation with our customers.

TECAWORK™ Ecogreen

Our Green Skarup garments are made of TECAWORK™ ECOGREEN – a comfortable and sustainable fabric made of 65% recycled polyester and 35% TENCEL™ Lyocell. TENCEL™ Lyocell uses 95% less water when produced compared to cotton. The mechanically recycled polyester reduces energy consumption by 45% in comparison with traditional polyester.

EPD®

Fristads Green products have an Environmental Product Declaration (EPD) that provides information about the garments environmental performance and content. The parameters are duly monitored and verified according to the standardized requirements of the international EPD® system and approved by a third party. More information is available at environdec.com. The EPD registration numbers are noted in the product texts.

Functional garments with stretch comfort.

All woven Skarup garments in STFP, LSH and LWS materials have attractive grey contrasting details, which become reflective when you highlight the garments in the dark.

Dark grey reflective details

2 chest pockets with flap and concealed snap fastening.
D-ring under the flap. Inner pocket.

Service & Industry.

Style, function and performance

We have a large selection of workwear for the service, industry, retail and distribution business. Garments that provide a perfect combination of function, comfort and durability and at the same time work optimally in smaller as well as larger operations. For a complete outfit, combine with T-shirts, polo shirts, shirts, sweatshirts and jackets.

Skarup.

The complete crossover collection

A collection in 10 colours of flexible and durable garments with functional design and great fit.

See Skarup chapter.

Complete your outfit

With matching T-shirts, polo shirts, shirts, sweatshirts and jackets.

See Tops and Cold wind rain chapters.

Well-dressed with all the features you need.

We have a wide range of service trousers for both men and women to suit different types of work. All with one thing in common, they are designed with pockets and functions specially developed for service work. Choose the sporty stretch trousers, the comfortable stretch jeans, the really lightweight trousers or the heavy durable classic ones.

Industry

Function and performance throughout the shift

In close collaboration with users in various industries, we have developed garments that meet high industrial demands and live up to the needs for function, comfort, durability and protection.

- Thoroughly tested materials with high durability and comfort
- Carefully designed fit for great comfort
- Function and design developed in close collaboration with users
- All P154 garments are leasing-laundry tested according to ISO 15797 and PRO-labelled
- The garments are designed to provide ample space for profiling with a company logo
- All garments are OEKO-TEX® certified

PRO

Fristads quality – even after several washes

As a given Fristads quality statement many of our products are approved for industrial laundry. If you see a PRO label in connection to or on a garment from Fristads, you know that it is tested for industrial laundry according to ISO 15797. The PRO label means that the garment can be washed at a minimum of 60˚C. In addition our garments are tested in some of Europe's largest laundries in cooperation with our customers.

Comfortable and durable for all types of industrial work.

Triple-stitched seams provide greater durability

Two chest pockets with flap and snap fastening, one with pen pocket

Inside mobile phone pocket with velcro fastening

Inside pocket

Designed to provide ample space for profiling with company logo

Front pockets

Concealed zip

Adjustable cuffs

Front pockets

Two back pockets, one with flap

Leg pocket with inside folding rule pocket – comfortably positioned over the side seam – and three extra pockets

Leg pocket with flap and mobile phone pocket with flap

Food Industry.

Comfortable and hygienic for very demanding requirements

This collection has been specially developed to meet the challenges faced by industry, manufacturing and handling where hygiene requirements are crucial. Comfortable clothing that is light, durable and satisfies strict laundering requirements.

Fristads Food collection is designed to comply with DIN 10524.

Fristads Food is a collection where all garments are specifically designed to comply with the different food risk areas stated in DIN 10524. As an example, workwear worn in high risk areas are not allowed to have external openings and fasteners must be made of metal. All garments in Fristads Food assortment are approved for industrial laundering.

What does DIN 10524 mean?

DIN 10524 standard "Food hygiene – Workwear in food business" provides instructions for the food industry relating to manufacturing and handling where hygiene requirements are crucial. The aim is to avoid contamination of food products caused by unsuitable or inappropriate workwear.

DIN 10524 is based on three hygiene risk levels; low, high and maximum. The correct hygiene risk level is dependent on the type of product that is handled.

Low risk: Handling of non-perishable foodstuffs, e.g pasta.

High risk: Handling of unpacked, perishable foodstuffs processed in an industrial manner, e.g. raw meat.

Maximum risk: Handling of unpacked and ready to eat foodstuffs that will not be heated further, e.g. salads.

ART NO	STYLE	RISK LEVEL DIN 10524
113840	Food long coat 3004 P154	High risk
114139	Food polo shirt 7605 PM	High risk
113842	Food shirt 7000 P159	Maximum risk
113843	Food shirt 7001 P159	High risk
113841	Food short coat 3003 P154	High risk
113839	Food trousers 2079 P154	Low risk*
120008	Food trousers 2082 P154	High risk**
122031	Food trousers 260 P154	Low risk*

* Can be combined with High risk coats, shirt and polo shirt.
** Can be combined with Maximum risk shirt

PRO

Fristads quality – even after several washes.

As a given Fristads quality statement many of our products are approved for industrial laundry. If you see a PRO label in connection to or on a garment from Fristads, you know that it is tested for industrial laundry according to ISO 15797. The PRO label means that the garment can be washed at a minimum of 60˚C. In addition our garments are tested in some of Europe's largest laundries in cooperation with our customers.

FOOD SHIRT 7001 P159

ART. NO: 113843

Durable lightweight material. Approved for industrial laundry. DIN 10524 High risk level

Complies with DIN 10524 standard / Side vents / Zone marking possible with subliminal transfer or embroidery / Leasing laundry-tested according to ISO 15797 / OEKO-TEX® certified.

MATERIAL 65% polyester, 35% cotton. **WEIGHT** 210 g/m². **COLOR** 900 White **SIZE** 2XS-4XL.

900

FOOD LONG SLEEVE SHIRT 7000 P159

ART. NO: 113842

Durable lightweight material. Approved for industrial laundry. DIN 10524 Maximum risk level

Complies with DIN 10524 standard / Adjustable cuffs / Side vents / Zone marking possible with subliminal transfer or embroidery / Leasing laundry-tested according to ISO 15797 / OEKO-TEX® certified.

MATERIAL 65% polyester, 35% cotton. **WEIGHT** 210 g/m². **COLOR** 900 White **SIZE** 2XS-4XL.

900

FOOD TROUSERS 2082 P154

ART. NO: 120008

Durable lightweight material. Approved for industrial laundry. DIN 10524 High risk level

Complies with DIN 10524 standard / Elasticated waist with drawstring / Adjustable leg ends with snap fastening / Zone marking possible with subliminal transfer or embroidery / Leasing laundry-tested according to ISO 15797 / OEKO-TEX® certified.

MATERIAL 65% polyester, 35% cotton. **WEIGHT** 245 g/m². **COLOR** 900 White **SIZE** 2XS-4XL.

900

FOOD TROUSERS 260 P154

ART. NO: 122031

Durable lightweight material. Approved for industrial laundry. DIN 10524 Low risk level

Complies with DIN 10524 standard / Elasticated waist with drawstring / 2 front pockets with concealed snap fastening / Back pocket with flap and snap fastening / Folding rule pocket / Leg pocket with flap and snap fastening, phone pocket with flap and velcro fastening / Adjustable leg ends with snap fastening / Zone marking possible with subliminal transfer or embroidery / Leasing-laundry tested according to ISO 15797 / OEKO-TEX® certified.

MATERIAL 65% polyester, 35% cotton. **WEIGHT** 245 g/m². **COLOR** 900 White **SIZE** 2XS-4XL.

900

HEAVY T-SHIRT 7603 TM

ART. NO: 114137

Approved for industrial laundry. OEKO-TEX® certified

Rib-knit round neck / Leasing-laundry tested according to ISO 15797 / OEKO-TEX® certified.

MATERIAL 65% polyester, 35% cotton. **WEIGHT** 200 g/m². **COLOR** 900 White **SIZE** XS-4XL.

900

FOOD POLO SHIRT 7605 PM

ART. NO: 114139

Approved for industrial laundry. DIN 10524 High risk level

Complies with DIN 10524 standard / Front placket with concealed metal snap fastening / Zone marking possible with subliminal transfer or embroidery / Leasing laundry-tested according to ISO 15797.

MATERIAL 65% polyester, 35% cotton. **WEIGHT** 240 g/m². **COLOR** 900 White **SIZE** XS-4XL.

900

FOOD CAP 560 P159

ART. NO: 100451

Hairnet / Velcro-adjustable neck / Zone marking possible with subliminal transfer or embroidery.

MATERIAL 65% polyester, 35% cotton. **WEIGHT** 210 g/m². **COLOR** 900 White **SIZE** One size.

900

FOOD APRON 705 P92

ART. NO: 100466

Waist ties / Length approx. 70 cm / Zone marking possible with subliminal transfer or embroidery / OEKO-TEX® certified.

MATERIAL 100% cotton. **WEIGHT** 240 g/m². **COLOR** 900 White **SIZE** One size.

Industry ESD.

Reduce the risk for electrostatic discharge

The human body is an excellent conductor of electricity. Just by walking around, we can build up a static charge of several thousand volts. ESD-related damage is a common source of faults during the production of electronics. The right workwear combined with other ESD-certified equipment is the only way to guarantee that your products are not exposed to discharge.

Our ESD collection focuses on comfort.

D-ring

2 front pockets

2 back pockets

Leg bellow pocket with flap and velcro fastening

Pen pockets and mobile phone pocket with flap and velcro fastening

Light and flexible material especially developed for the production and assembly of ESD sensitive products

OEKO-TEX® certified

Adjustable leg length with 5 cm hem allowance

ESD TROUSERS 2080 ELP
Art no 120954

ELECTROSTATIC PROTECTED AREA (EPA)

The EPA areas are set up to prevent ESD damage associated with the production of sensitive electronic products. The EPA areas must be free of objects that can collect charge. There are usually requirements for the ESD certification of all equipment, all materials and all fittings within the EPA areas. Our products for working in EPA environments are approved by RISE – Research Institutes of Sweden (www.ri.se).

XTM/XPM MATERIAL

XTM and XPM are comfortable materials in strong single jersey made from 48% cotton, 48% polyester and 4% conductive fibres. The materials have been especially developed for the production and assembly of ESD sensitive products. They have been tested according to the IEC61340 standard and meet the requirements for use in protected areas – Electrostatic Protected Area (EPA).

XSM MATERIAL

XSM is a soft knitted sweatshirt material that is a blend of cotton, polyester and conductive fibres. The material has been especially developed for the production and assembly of ESD sensitive products. It is approved according to the IEC 61340 standard and meets the requirements for use in protected areas – Electrostatic Protected Area (EPA).

ELP MATERIAL

ELP is a light and flexible twill made from 67% polyester, 31% cotton and 2% conductive fibres, which provides good conductivity. The material has been especially developed for the production and assembly of ESD sensitive products. It is approved according to the IEC 61340 standard and meets the requirements for use in protected areas – Electrostatic Protected Area (EPA).

Industry Cleanroom.

Workwear for cleanrooms and controlled environments

Cleanrooms and other controlled environments require clothes that act like a filter and catch the millions of particles that are emitted from our bodies every minute. Our clothes and accessories for cleanrooms are manufactured in technically advanced synthetic materials that don't pollute the air with particles or fibres. They are also comfortable, moisture-wicking and designed for maximal range of motion.

What is a cleanroom?

A cleanroom is an environment with a controlled level of pollutants such as dust, airborne microbes, aerosols (gas with particles) and chemical vapours. The pollution level is specified as the number of particles equal to or greater than 0.5 micrometers (abbreviated as µm = one millionth of a metre) per cubic metre of air. A hair is approximately 100 micrometres (µm), so the particles we are talking about are extremely small. To provide further perspective, normal outdoor air in an urban environment contains approx. 35,000,000 particles equal to or greater than 0.5 micrometers (µm) per m^3 while a cleanroom of ISO class 3 is permitted to contain no more than 35 particles of the same size.

Why does a cleanroom need to be so clean and how is this achieved?

After World War II technical development underwent significant expansion, but this was soon accompanied by problems. Aircraft flew off course, computers lost memory, hospital infections increased and road traffic sometimes came to a standstill because the traffic lights refused to change from red to green. It was discovered that the cause of this was the pollutants built in during the manufacture of technical equipment and medical devices. The smaller the components people tried to use, the worse the problem got. The first cleanrooms were built in the 1960s, and with the aid of a constant flow of air filtered through what is known as a HEPA (high-efficiency particulate air) filter, it was possible to successfully lower and control particle levels in a very effective manner.

Keeping an empty room clean is not the biggest challenge

The problems start when you put equipment into the room – and people to handle the equipment. People give off hundreds of thousands of particles in the form of skin cells, micro-organisms and hair, and for every minute that goes by, and the more we move, the more particles we give off. In practice, this requires putting filters around the human body to prevent particles from entering the air.

Fristads has manufactured clothing for cleanrooms and controlled environments since 1996.

This is why we only use synthetic fibres

Workwear for cleanrooms must not give off particles or fibres. Cotton and other natural materials are woven from short fibres that detach easily and are therefore unsuitable. Cleanroom clothes consist of synthetic fibres – filament polyester, i.e. endless fibres.

The Fristads "bound seam"

Our bound seam is a refined version of the standard bound. It is more impermeable because the hem is like a hood. It is stronger because double rows of stitches each pass through six layers of fabric. It is safer because the carbon filaments woven into the hem produce good electrostatic discharge, even after repeated washes.

Cold, Wind, Rain.

We know how to dress properly when the weather demands it

Functional and comfortable workwear makes your workday easier, particularly in harsh weather conditions. When it rains, is windy or cold, your clothes really need to do their job. No matter the weather we have a wide range of workwear to keep you comfortable, dry and warm throughout the day.

Jackets for all conditions and every situation.

- Highly functional products for all types of weather
- Thoroughly tested materials with high durability and comfort
- Function and design developed in close collaboration with users
- Carefully designed fit for great comfort
- Complete range of garments for dressing according to the 3-layer principle
- Wide range of sizes. Most garments are available from XS and some up to 5XL
- Cooperation with well-known brands such as GORE-TEX and Polartec®

Keep warm in the cold and dry in the rain with the 3-layer principle.

Our high-tech and functional garments are designed to protect you even when you have to work in heavy downpours, icy winds and snow. At the same time, and despite heavy manual work, your clothing must transport away excess heat and moisture and you must be able to move freely. Dressing according to the 3-layer principle is a smart and effective way to keep dry and avoid getting cold. The right clothes interact so you can perform at work and manage more – in all types of weather and all seasons.

Layer 1

Moisture transport

The base layer keeps you dry closest to your body. Keeps moisture away from the skin and prevents your body from getting cold.

Layer 2

Insulation

The middle layer insulates while letting out moisture from the base layer. Select the thickness of the garment based on your working conditions.

Layer 3

Protective layer

The outer layer, or shell layer, protects against wind, rain and snow – but lets out evaporating moisture.

Work safely whatever the weather.

- Completely water and windproof
- The only workwear that is tested in a rain room
- Long life span – saves money
- Maximum use: spring, winter and rain garment in one
- Carefully tested for the best function and quality
- Can withstand 60° laundry
- ePTFE membrane
- All seams are taped with ePTFE tape
- High breathability – RET 2,5-6
- Withstands up to 28,000 mm water pillar in Gore's own tests

Discover our GORE-TEX shell jacket 4864 GXP, 131287

Airtech® protects against the cold, wind, rain and snow.

Fristads Airtech® is a water- and windproof material that protects against the cold, wind, rain and snow. The material is also breathable and keeps you dry and comfortable by allowing excess heat to escape.

- Waterproof
- Windproof
- Breathable
- Taped seams
- Waterpillar 10,000 mm
- Breathability RET<15

Fristads Green – a sustainable way to dress for colder days.

Clean design and conscious material choices – Fristads Green is a collection characterised by environmental awareness and innovation to minimise the footprint on the environment. Read more at fristads.com.

- Garments with an EPD – Environmental Product Declaration
- Made of 100% recycled materials
- Quilted jacket with recycled PrimaLoft® padding
- e.dye® – reduces water consumption by 75% compared with traditional dyeing
- Wear them separately or together – a perfect combination for use all year round

EPD® *By setting a standard for measuring environmental impact (EPD) which the entire textile industry can use, we want to contribute to change and greater transparency with regard to environmental impact. Read more on fristads.com and at www.environdec.com.*

The quilted jacket can be fasten into the shell jacket, creating a functional and sustainable winter garment.

High Visibility.

Safety and all-weather comfort that stands out

When visibility is crucial at your work site, our high-visibility workwear will help maximise your personal protection. Our fabrics in fluorescent colours and reflective tapes meet the latest international standards and our certifications ensure that you are visible in all light and weather conditions.

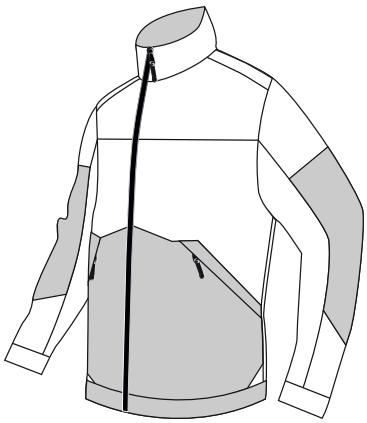

It’s all about keeping you safe and comfortable at work.

- All garments are certified according to the standard for high-visibility garments
- Thoroughly tested materials with high durability and comfort
- Carefully designed fit for great comfort
- Function and design developed in close collaboration with users
- Our garments are certified together so you can combine them to attain the highest class
- Most garments are leasing-laundry tested according to ISO 15797 and withstand 25-50 washes
- Best quality reflective tapes meet high washing requirements and durability
- Double-stitched seams on all reflective tapes give even better durability
- Women's collection with feminine fit
- Large range of sizes. Most garments are available from XS
- Highly functional products for all types of weather and seasons
- CORDURA® reinforcements for extra durability
- Most garments are OEKO-TEX® certified

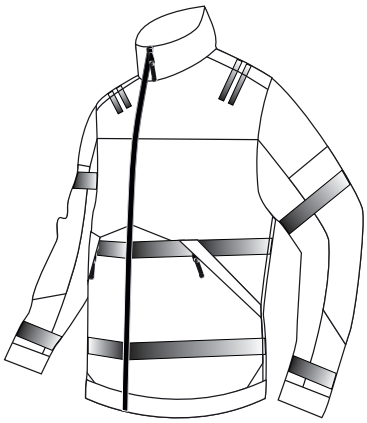

EN ISO 20471 – an international standard for your safety

All our high-vis garments are certified according to the standard EN ISO 20471 and tested by accredited, laboratories. We also test the garments in our own laboratory to make sure that the quality of the product meets our exceptionally high standards.

COMFORT AND FUNCTION

The design of the garments should fit well so they are comfortable to wear and easy to work in. At the same time, they should provide all the functions needed in day-to-day work. Our materials are carefully tested to withstand tough working conditions while complying with all the requirements for international certifications.

VISIBILITY AT NIGHT

Reflective tape increases visibility in the evening and at night. The positioning of the reflective tapes on the garments is carefully tested to provide maximum visibility. We only use reflective tape of the highest quality, which meets high washing requirements and is durable.

VISIBILITY DAYTIME

To make the garments visible in daylight, we use certified materials in fluorescent colours. The colours must withstand many washes and abrasions without fading. In most cases, the products are designed with dark contrasting colours, which are strategically placed to cover the areas that are most exposed to soiling and wear.

How visible do you need to be?

You can easily combine our garments to attain the safety class that suits your job.

All high-visibility garments are certified in three different classes – 1, 2 and 3 – depending on how visible they are. In Fristads' High Visibility Clothing System our garments have been certified together, so you can easily combine different garments to attain the highest class 3 protection.

This is a common way of dressing when you work in the service and transport business. You are not required to wear clothing with the highest protection, but still have a need for enhanced visibility. If you wish to be more visible just add a class 2 or 3 top.

HIGH VIS SOFTSHELL JACKET WOMAN CLASS 2 4183 WYH
Art no 125023

HIGH VIS STRETCH TROUSERS WOMAN CLASS 1 2708 PLU
Art no 127735

Being clearly visible at large construction sites can be crucial. Many craftsmen choose to wear garments with higher visibility. You can combine one of our class 1 craftsman trousers with a sweatshirt or jacket to get a higher class 2 or 3 protection.

HIGH VIS LONG SLEEVE T-SHIRT CLASS 2 7457 THV
Art no 129514

HIGH VIS CRAFTSMAN STRETCH TROUSERS CLASS 1 2706 PLU
Art no 127732

For anyone working on roads, railroads and other places where staying alive is dependent on being sufficiently visible, this is the way to go. For these types of jobs there are strict regulations on how to dress and we can provide a wide range of certified garments to guarantee the highest class 3 protection.

Protect yourself and the planet.

During 2022 we launched the Fristads Green High-Visibility collections, the first of their kind in the world. All the garments in this collection come with an Environmental Product Declaration and have been analysed from a lifecycle perspective to minimise the environmental footprint. The result is a ground-breaking collection of workwear that protects the user while at the same time treading lightly on the planet.

Use our Green Calculator at fristads.com to see the difference your choice of workwear can make.

Stiby

The safe choice for stretch comfort.

Stiby is the ideal choice for workers within building & construction and for everyone who values stretch comfort in their everyday work. The heart of Stiby is our sustainable garments in the GSTP material. With sustainable 4-way stretch throughout and rib-knit stretch panels at the waist, these garments have double the comfort and a significantly lower environmental impact than regular high-vis workwear.

Stiby also includes selected trousers and tops with stretch comfort which are in the process of being updated with sustainable materials.

Highlights Stiby

Garments made of GSTP material

- Part of Fristads Green collection
- Comes with EPD – Environmental Product Declaration
- Recycled polyester and biobased material
- 4-way stretch
- Lightweight
- Comfortable
- Approved for 60° laundry
- OEKO-TEX® certified
- Weight 260 g/m²

Trofta

The safe choice for lightweight comfort.

Trofta offers a wide range of garments targeted to workers within road, building & construction, service, logistics and maintenance. Made of organic cotton and polyester from recycled PET bottles, and reinforced where you need it the most, this collection of lightweight high-visibility workwear is both sustainable and durable.

Going forward, Trofta will be complemented with tops and jackets to complete the sustainable outfit.

Highlights Trofta

Garments made of GPLU material

- Part of Fristads Green collection
- Comes with EPD – Environmental Product Declaration
- Recycled polyester and organic cotton
- Lightweight
- Comfortable
- Durable
- Approved for industrial laundry 75°
- OEKO-TEX® certified
- Weight 240 g/m²

Work safely whatever the weather

GORE-TEX material

- Completely water and windproof
- The only workwear that is tested in a rain room and withstands 60° industrial washing
- Long lifespan – saves money
- Maximum use: Spring, winter and rain garment in one
- Carefully tested for the best function and quality
- ePTFE membrane
- All seams are taped with ePTFE tape
- High breathability – RET < 6
- Waterpillar 28,000 mm in GORE's own tests. Independent test institutes only test up to 10,000 mm

Tested in rain room

Before any new GORE-TEX garment style is put into production it must pass the Gore Rain Room Test. This sophisticated outerwear testing facility is designed to simulate a variety of demanding, lifelike rain conditions. Using specially engineered rain nozzles strategically positioned in the chamber, we are able to test a garment's waterproof design in conditions that range from light drizzle to wind-driven rain.

Protects against cold, wind, rain and snow

Airtech® material

Fristads Airtech® is a water and windproof material that protects against cold, wind, rain and snow. It is also breathable and keeps you dry and comfortable by allowing excess heat to escape.

- Waterproof
- Windproof
- Breathable
- Taped seams
- 10,000 mm waterpillar
- Breathability RET <12
- Approved for industrial laundry

Fristads High-Visibility Clothing System

Reach the highest safety class by combining your garments.

All high-visibility garments are certified according to EN ISO 20471 and are divided into three different classes – 1, 2 and 3 – depending on how visible they are. Class 3 is the highest level of visibility.

In the Fristads High Visibility Clothing System we have co-certified our collections, so garments in class 1 or 2 can be combined in various ways to obtain a higher safety class.

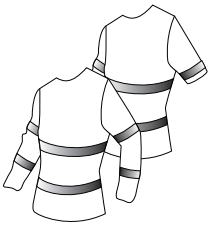

MINIMUM AREA IN M² TO OBTAIN APPROVAL ACCORDING TO EN ISO 20471

MATERIAL	CLASS 3	CLASS 2	CLASS 1
Fluorescent	0.8	0.5	0.14
Reflective	0.2	0.13	0.1

We have created a quick-reference guide which conveniently shows how to combine your Fristads garments to obtain the requested visibility class. All garments have been given a specific code, based on type of garment and classification, for example U3 or T4. The code is shown as a symbol in the product information and in the CE label in the garment. This information is also available at fristads.com.

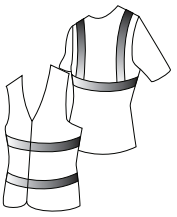

OUR QUICK-REFERENCE GUIDE SHOWS ALL OPTIONS

Example: A high-vis T-shirt in class 2 (labelled U3) can be combined with a pair of craftsman trousers in class 2 (labelled T4) to obtain class 3 certification for the whole set.

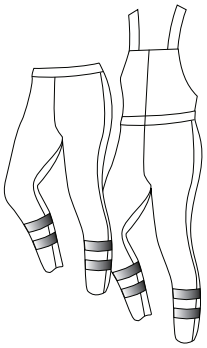

UPPER BODY (U)

Short or long sleeved garments with reflective tape on sleeves

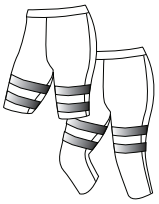

WAISTCOAT (W)

Waistcoats/Short sleeved tops without reflective tapes on sleeves

TROUSERS* (T)

Trousers with long legs/ Bib'n'Braces with reflective tape

SHORTS (S)

Shorts/Pirate trousers with reflective tape

	U1	U2	U3	U4	U5	U6	W1	W2
T1	1	1	2	2	2	3	2	3
T2	1	1	2	2	3	3	2	3
T3	2	2	2	3	3	3	3	3
T4	2	2	3	3	3	3	3	3
T5	2	3	3	3	3	3	3	3
T6	3	3	3	3	3	3	3	3
S1	1	1	2	2	2	3	2	2
S2	2	2	2	3	3	3	2	2

* Upper body (U) and Waistcoat (W) must be worn over the Bib'n'Brace to obtain class 2 or 3. If they are worn under, the Bib'n'brace itself determines the class.

Visit fristads.com to access the table for maximum allowed area of embroidery and transfer of high-visibility garments.

Flame Protection.

Your protection, no compromises

Increase your safety at work with our broad assortment of flame-protective garments, made to fit your profession and risk level. By choosing our flame-retardant garments you get the ultimate protection according to the latest European norms. To ensure Fristads quality, we also perform our own tests – comprising anything from strength, tensile and abrasion, to real life usability and user comfort.

Read more in our Flame brochure.

At Fristads we put the worker's safety first. By choosing our flame-resistant garments you can be confident that you have the best possible protection according to the latest European norms. For more detailed information about our wide range of flame protection garments, see our specialised Flame brochure.

Find the brochure on fristads.com.

Fristads welding class 2 collection.

Our collection approved for class 2 welding is designed with extra durable materials and stands out for its soft comfort.

The easy way to increase your visibility.

With our quick-reference guide you can easily combine high visibility garments in class 1 or 2 to obtain a higher safety class.

Flame protection has never been lighter or softer.

Our trousers collection in stretch material gives flame protection a new level of comfort.

Your safety is our top priority.

- All garments are certified according to European norms
- Thoroughly tested materials with certified protection, high durability and comfort
- Complete range of inherently flame-protected as well as flame-retardant treated garments in all three layers
- Carefully designed fit for great comfort
- Function and design developed in close collaboration with users
- Layer-on-layer tested in different combinations for protection against electric arc
- Layer-on-layer tested for welding class 2 and increased heat and flame protection
- High-visibility garments are certified together so you can combine them to attain the highest class – Fristads high-visibility clothing system
- The majority of the garments are leasing-laundry tested according to ISO 15797 and PRO labeled. The garments are certified after 25-50 washes
- Best quality reflective tapes meet high washing requirements and offer considerable durability
- Double-stitched seams on all reflective tapes give even better durability
- Flame-retardant and antistatic CORDURA® reinforcements
- Women's collection with feminine fit in both our Flamestat and Flame collections
- Large range of sizes. Most garments are available from XS
- The majority of the garments are OEKO-TEX® certified

How much protection do you need?

A risk assessment at a workplace begins with an analysis of all the potential hazards. The findings from this study help in determining suitable garments that offer the correct level of protection and the best comfort. We provide personal protective workwear solutions for almost all occupations, working conditions and – not least – for all your risk assessments. Examples of hazards that are investigated in a risk assessment:

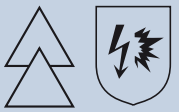

Thermal hazards: High convective heat, high radial heat, flame contact, steam, molten metals and hot surfaces.

Electric hazards: High voltage, electric arc, static charge build-up.

Read more in our Flame protection brochure and at fristads.com.

Knee protection

EN ISO 15797
Industrial laundry

The best way to protect yourself is to have multiple layers of garments.

Flame retardancy prevents flames from spreading. However, heat can spread through the garment, causing skin burn injuries. If you wear flame-retardant garments, they will protect against heat for a certain period. Wearing additional layers of flame certified garments will significantly increase your protection.

Layer 1

Inner layer

Flame-retardant underwear adds to your protection. It transports body moisture away, keeps you dry and prevents chilling of the skin.

Layer 2

Insulation layer

An additional, flame-retardant, insulation layer provides heat insulation and additional protection. Select garment thickness based on your working conditions.

Layer 3

Protective layer

The outer layer is the protective shield that secures your safety.

Maximise your electric arc protection.

By wearing several layers of protective garments you increase the amount of energy that a garment system can withstand in the event of an electric arc accident. We have conducted electric arc tests with different clothing combinations to ensure correct values and provide as much protection as possible.

To achieve correct test values, the entire combination of clothes (layer 1-3) must be tested together. It is not possible to calculate a correct test value simply by adding up the values of each individual garment.

See the exact values for different garment combinations at fristads.com.

ELIM – the new way to state the safety of your clothes

ELIM (Incident Energy Limit) is the new common way to state the calorific value of ATPV and EBT in open arc testing. ELIM measures the amount of energy a garment can withstand and still maintain a 0% risk of second-degree burns for the person wearing it, whereas ATPV and EBT both measure exposure with a 50% risk of a burn. That means the ELIM value always will be lower than ATPV and EBT.

We are currently updating and recertifying the garments in our existing flame assortment to reflect the new ELIM value.

Increase your welding protection.

Attain the highest welding certification – class 2

Increase your protection against radiant heat, contact heat and molten iron splashes

Fristads' layer-on-layer tests show how to attain an increased level of protection by combining different garments. This applies to welding (EN ISO 11611) and protection against heat and flame (EN ISO 11612). The key to achieving this higher level of protection is to use our underwear in MOF fabric underneath your ordinary welding protective clothing. You can easily see how much your protection increases by checking our layer-on-layer table at fristads.com.

Certified garment combinations are approved for:

INCREASED PROTECTION FOR WELDING – EN ISO 11611

Applies to welding garments in our Flamestat and Flame collections in combination with MOF long underwear. Fristads also has a welding collection approved for welding class 2.

INCREASED PROTECTION AGAINST HEAT AND FLAME – EN ISO 11612

Radiant heat: C2, Molten iron splash: E3, Contact heat: F2

Applies to welding garments from our Flame and Flamestat collections in combination with our MOF underwear. Garments that are not approved for welding will get increased protection against radiant heat C2 and contact heat F2. However, they will not be certified for molten iron splash E3 since the design features loose-hanging pockets. See the result for different garment combinations at fristads.com.

Choose inherent or flame-retardant treated

To protect your skin, all our flame-retardant garments feature textile technology that inhibits the combustion process and creates a protective barrier between the heat source/the flame and the skin to prevent second-degree burns in the event of an accident. Our range of flame-protected garments is divided in two categories – Flamestat and Flame. All garmets in both our Flamestat and Flame collections are OEKO-TEX® certified, which means that all parts of the garment are free from harmful substances and don't pose a risk to your health.

Flamestat – Materials with inherent flame protection

The flame protection in our Flamestat collection fabrics is already integrated in the fibres. These garments have a permanent flame protection that lasts the entire lifespan of the garments. Materials with inherent flame protection are soft and comfortable. Our GORE-TEX material GXE has inherent flame protection in the laminate. Modacrylics, wool and flame-retardant viscose are other examples of materials with inherent flame protection.

Flame – Materials that are flame-retardant treated

The garments in our Flame collections are made of flame-retardant treated materials. The treatment interacts with the cotton in the material and gives a permanent protection that lasts the entire lifespan of the garment. Cotton and polyester fabrics that have been treated with the flame-retardant additive Proban.

Combine your high-visibility garments to increase the safety class

In Fristads' high-visibility clothing system we have co-certified our collections, so garments in class 1 or 2 can be combined in various ways to obtain a higher certified safety class. By using our quick reference guide, you can easily see how to combine our garments to reach the requested visibility class.

Your guide to workwear.

Want to personalise your workwear? Or just need a helping hand in finding the right size and style? Here's everything you need to know to order the garments that fit you and your demands.

Value-added services.

Our garments can be personalised in many different ways. We can help you with everything from logotype embroidery to complete personalised workwear solutions. Please contact our customer service department for further information.

Here are some suggestions for where logotypes are normally placed with heat transfers.

Heat transfers

Heat transfers give distinct prints with an increased level of detail in clear colours. We use high-quality transfers (they withstand industrial washing) to personalise garments with the customer's logotype. You can order from 50 items based on a logotype made as a vectorised EPS file. We can keep these in stock for later heat transfer.

Embroidery

Embroidering straight onto the garment adds a touch of exclusivity, taking the overall impression up a notch. We embroider the customer's logotype directly onto garments or, for example, the name and title onto labels that can be sewn onto garments or fastened in place with Velcro. We produce embroidery templates based on logotypes (vectorised EPS files) obtained from customers.

Name embroidery

Embroidering people's names on their garments is an attractive way of personalising them. The standard text height is 10 mm. Choose one of the styles shown above, regular upright or italics, in the colour of your choice. Upright lettering can also be produced in block capitals.

Name transfer

You can also clearly label your clothes with personal names. Max. width 10 cm. Titles and long names can be placed on two rows. Choose between different styles in the most common colours. Naturally, the name can also be printed in block capitals or as first and last name.

Name signs

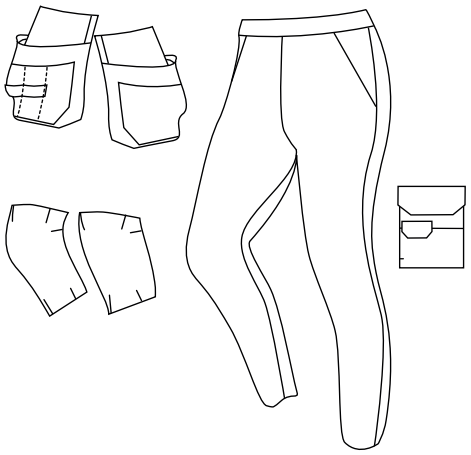

Using laser, we engrave and cut signs with personal or company names in laserply, which is a plastic material, and AlumaMark, a specialised aluminium. We can also engrave certain types of metal belt buckles. We make your sign based on a file in vector format such as Ai, EPS or vectorised PDF, and we have a wide selection of colour combinations from which to choose.

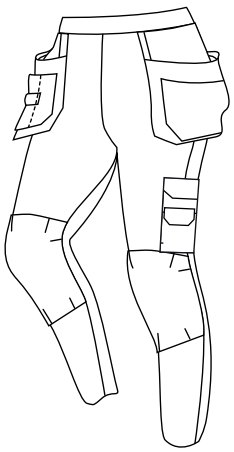

Modifications

Sample ways of modifying Fristads' stocked garments at additional cost. We can provide alterations to existing garments, for instance:

- Sewing on extra reflective tapes
- Lengthening and shortening legs and sleeves
- Sewing on knee pockets, loose-hanging pockets, leg pockets, mobile phone pockets etc.
- Covering buttons with flaps and plackets
- Personalising stocked garments with special colours on collars, pocket flaps and cuffs etc.

PLEASE NOTE!
For seam adjustments to waterproof, windproof and certified garments, please contact our customer service.

Reflective tapes

Reflective tape can be attached to finished garments as in the sketches, at additional cost. Reflective tape is available in the colours 70 Yellow, code: 129 and 95 Silver grey, code: 106. Yellow reflective tape can only be sewn on, not ironed on. Garments with reflective tape should be washed according to the instructions below.

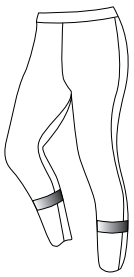

PLEASE NOTE!
Follow the washing instructions for the garment if they state a lower temperature.

Silvery grey reflective tape

Yellow reflective tape

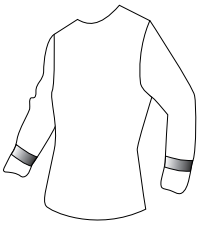

One strip of reflective tape around the leg.

One strip of reflective tape around the leg and sleeve.
version: OX 251. 25 mm reflective tape.
version: OX 501. 50 mm reflective tape.

Two strips of reflective tape around the leg and sleeve.
version: OX 252. 25 mm reflective tape.
version: OX 502. 50 mm reflective tape.

One strip of reflective tape around the leg, sleeve and at the bottom of the back (L. 25 cm).
version: ORX 251. 25 mm reflective tape.
version: ORX 501. 50 mm reflective tape.

Certifications

IEC 61482-2

IEC 61482-2

Electric arc "Box and Open arc test". Certified protective clothing.

EN ISO 14116

Flame, limited flame spread. Certified protective clothing.

EN ISO 11611

Welding and allied processes. Certified protective clothing.

EN 1149

Electrostatic properties, design requirements. Certified protective clothing.

EN ISO 11612

Heat and flame. Certified protective clothing.

EN 13034

Liquid chemicals, limited protection. Certified protective clothing.

All flame protection certification read more at fristads.com

All certifications read more at fristads.com

EN ISO 13982-1

Protective clothing for use against solid particulates.

The standard specifies the minimum requirements for chemical-protective clothing resistant to penetration by airborne solid particles. Additional partial body protection may be required such as hoods, gloves, boots, visors or respiratory protective equipment.

EN ISO 20471

Certified and approved garments for protection when the user needs to visually signal his or her presence to vehicles in daylight, at night or in poor weather conditions.

High-visibility clothing has a fluorescent surface and retroreflective material to meet certification requirements in three different classes. Class 3 is the highest safety class. The performance class can be obtained using a single garment or a clothing assembly, for instance jacket and trousers. This will be stated on the CE-label. A class 3 garment shall cover the torso and shall have either sleeves with retroreflective bands or full-length trouser legs with retroreflective bands.

RIS-3279-TOM

Rail industry standard for high visibility clothing

British rail industry standard for high-visibility clothing. All maintenance staff must wear orange high-visibility clothes when working on or near the railway tracks. Hence the properties of the fabric therefore need to fulfill certain minimum technical criteria for the fluorescent and reflective areas of the orange colour. RIS-3279-TOM must be combined with EN ISO 20471 to be valid.

EN 343

Certified and approved garments provide protection against rain and inclement weather.

Requirements and test methods for fabrics and seams of protective clothing against the influence of rain, snow, fog and ground humidity. Resistance to water penetration (A) and water vapour resistance (B) is measured.

A: Resistance to water penetration: 1-4, where class 4 provides the best waterproofness

B: Breathability – water vapour resistance: 1-4, where class 4 provides the best breathability

C: Impact from above with high energy droplets (optional)

The EN 343 norm was updated during 2019 with the addition of class 4 (previously class 1-3). Fristads waterproof garments released during 2020 have been tested according to the new version of EN 343.

An ongoing update and recertification of existing garments is underway with the aim of being ready in 2022. Product information will be updated continuously at fristads.com

Waterproofness and breathability of Fristads garments

The waterproofness in Fristads garments is tested with a water column of 10,000 mm and the assortment is categorized as following:

20,000 mm >	Extreme weather conditions
15,000 mm	Heavy rain for a long time
10,000 mm	Continuous rain for a long time
5,000 mm	Moderate rain for a long time
3,000 mm	Light to moderate rain for a shorter period of time

Breathability is indicated in the RET value. The lower the RET value, the better the breathability.

RET 0-6	Extremely good or very good breathability
RET 6-13	Very good or good breathability
RET 13-20	Good or satisfactory breathability
RET 20-30	Unsatisfactory or limited breathability
RET 30 +	Unsatisfactory or no breathability

EN 342

Certified and approved garments provide protection against cold weather, i.e. thermal insulation properties and air permeability.

The norm tests three criteria, but only has requirements for A and B.

A: Effective thermal insulation (Icler).

B: Air permeability

C: Resistance to water penetration (optional)

A cold climate is characterised by a combination of moisture and a temperature below -5°C.

EN 342 indicates the value of the resulting effective thermal insulation for the user. The value is measured for light and medium duty tasks for a certain period of time.

EN 14404

Knee protectors for work in the kneeling position

Type 1: Knee protectors independent of other clothing and that fasten around the leg.

Type 2: Knee protectors made of foam plastic or other padding material to be placed in pockets on trouser legs, or permanently attached to trousers.

Type 3: Knee protectors that are not attached to the body, but put in place as the user moves around.

Type 4: Knee protectors for one or both knees, which are parts of devices with additional functions such as a frame to aid standing up, or a kneeling seat.

Performance level 0:
Suitable only for use on flat floor surfaces.

Performance level 1:
Suitable for use on flat or non-flat floor surfaces and providing protection against penetration at a force of at least 100 ±5 N.

Performance level 2:
Suitable for use on flat or non-flat floor surfaces in severe conditions and providing protection against penetration at a force of at least 250 ±10 N.

Washing instructions for high-visibility garments

Dirty garments provide poorer protection. High-visibility garments should be washed separately or together with other garments that are approved according to EN ISO 20471. Wash them inside out. Follow the washing instructions on the garment. Do not use detergents containing optical whiteners. Do not use fabric softeners or bleaching agents. Close all zippers before washing. GORE-TEX garments should be tumble dried or ironed at low temperature. The heat helps to reactivate the membrane.

Fristads quality – even after several washes

As a given Fristads quality statement many of our products are approved for industrial laundry. If you see a PRO label in connection to or on a garment from Fristads, you know that it is tested for industrial laundry according to ISO 15797.
The PRO label means that the garment can be washed at a minimum of 60˚C. In addition our garments are tested in some of Europe's largest laundries in cooperation with our customers.

Washing instructions

Please note that it is important to use only laundry detergent for colours when washing coloured garments.

- Washing, normal process, with specified temperature.
- Washing, mild process, with specified temperature.
- Washing, very mild process, with specified temperature.
- Do not bleach.
- Any bleach allowed.
- Tumble drying at max. 80º C, normal temperature.
- Tumble drying at max 60º C, low temperature.
- Do not tumble dry.
- Iron at maximum sole-plate temperature of 200°C.
- Iron at maximum sole-plate temperature of 150°C.
- Iron at maximum sole-plate temperature of 110º C without steam.
- Do not iron.
- Professional dry cleaning in tetrachloroethene and all solvents listed for the symbol F, normal process.
- Do not dry clean.

Garments that are made of more than 50 % more sustainable materials.

Fristads Green
Garments that have an EPD - Environmental Product Declaration.

Fristads stretch

4-WAY STRETCH
The 4-way stretch is a highly elastic material which stretches in every direction, offering full flexibility.

STRETCH
The 2-way stretch stretches in one direction, offering flexibility and comfort.

MECHANICAL STRETCH
Mechanical stretch contains no stretch fibres but is weaved to offer some stretch for extra comfort.

Colour index.

Please note that the colour dots are only indications of the original colours. Subject to color deviations in the printing.

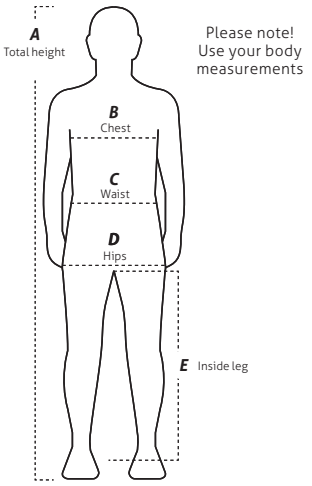

Size guide – workwear.

Starting from your own body size, compare to the tables to find the correct size. Choose the table matching your height (A).

The tables for women's garments only apply for garments for woman, otherwise, the tables for men apply. There are separate size tables for Acode.

When buying trousers, measure A, C, D, E and for jackets, measure B (sizes XS-5XL). Measure A, B, D, E for coveralls and, depending on your height, choose regular, long or short in the tables.

Please note!
All measurements given in the tables are body size, except the inside leg, which is equivalent to the garment's size.

Jackets, trousers and coveralls

Men sizes		XS		S		M		L		XL		2XL		3XL		4XL		5XL
